Mr. Daniel Mattrocce
Retirement System General Manager
Employees' Retirement System

San Francisco, CA 94102

Dear Mr. Mattrocce:

The Accounting Division services approximately 600 members' accounts for partial payments of Social Security shortages, prior service and redeposits. Our EDP Unit must research, correct and note payments made by payroll deductions from the individual member's account every month. Member Service maintains payment records and updates the outstanding balances due and issues the annual statement.

Many members are paying for their shortages in amounts as little as $5.00 bi-weekly and this means a very long and extended repayment period.

I would like to recommend to the Board a resolution to eliminate partial payments for prior service and Social Security shortages, but allow the members to pay in one lump sum prior to their retirement. Redeposits are covered by the Charter and must be paid within three years.

I am recommending this cut-back in non-legally required services because of the personnel cut-backs that the Department has had for the past two years. Members can set up a savings schedule and deposit their funds bi-weekly with a savings and loan organization, a credit union or a full service bank of their choice.

Very truly yours,

Savas Araboglou
Head Accountant I

This position (Account Clerk) requires approximately 1,088 man hours or virtually one entire man year to perform its various functions which are: updating partial payments; performing research for retirement estimates, social security shortage, redeposits, and providing member financial data to the judicial agencies involved in divorce proceedings.

Two years ago legislation was enacted which liberalized prior service benefits and thereby increased our partial payment case loan from an average of 200 accounts to its present level of 600 cases.

We had expended 334 man hours per year servicing these partial payments. As a result of the new legislation the time now required to perform this function approaches 920 man hours or roughly a 300% increase in the workload.

Due to budgetary limitations, the Accounting Division found it could not properly service any new accounts.

Dear Mr. Mattrocce:

It has been brought to our attention that your Head Accountant Savas Arabaglou has suggested the elimination of partial payments for prior service and Social Security short gap.

Please be advised that C.S.A. Local 400 strongly opposes this elimination of a minor fringe benefit.

Few people would have this lump sum necessary to attain their maximum retirement. An attempt to borrow such an amount just prior to retirement would place an undue burden on the individual, a burden he could not economically handle and thus he would be denied this needed additional income for the rest of his life.

The argument that he could set aside this amount in the credit union or some other financial institution in the form of savings is not plausible. In my seventeen years experience with the operations of the San Francisco Police Credit Union and the California State Employees Credit Union, I found that few people had the will power [illegible] to [illegible] payroll savings over a long period. Too many [illegible] that reduce savings, this ultimately would discourage most individuals and deny them their future retirement.

Servicing six hundred accounts is not that great an accounting problem. In addition if it allows people a livable retirement, need there be more said.

MEMORANDUM

To: Daniel Mattrocce, General Manager

Subject: The determination of Average Final Compensation

Administrative Code Section 16.30-1, as amended on December 28, 1971, defines Average Final Compensation ".....to be the average monthly compensation earned by a member during any year of credited service in the retirement system in which his average earned compensation is the highest."

The word "year" as used above has been interpreted to mean a fiscal year or the last 26 payperiods immediately prior to the date of retirement.

A "year" defined in terms of service credit (Administrative Code Sections 16.37-4) is 10 months or more of paid city service in any fiscal year except in the year of retirement, which is computed on the basis of 12/12 of a year.

An employee retiring on July 1 of any given year receives credit in the fiscal year ending on June 30 (the day before the effective date of retirement) on the basis of 10/12 of a year, since the "year of retirement" is actually the new fiscal year beginning on the date of his retirement.

[illegible] time lost due to any cause, he receives one full year of service credit, provided he has earned full salary for at least 10 months during that fiscal year, and the salary earned during that period, if the highest, is used to determine average monthly compensation.

Therefore, to include a proportionate amount of salary from the next previous fiscal year to cover the period of salary lost in the year of highest earnings, for the purpose of increasing average monthly compensation, would be in violation of the above named statutes.

Dear Sirs:

It has come to the attention of the Executive Board of this Chapter of Local 535 that the City Employees' Retirement Board is contemplating investments in real estate.

As our union represents city employees whose pensions are dependent upon proper investment by the Retirement Board, we would like to express our deep conviction that pension funds not be used for real estate speculation.

We would like to suggest an alternative: that our pension funds be used to build low and middle income housing, preference to be given to city workers. Such a use of pension fund monies has been carried out in other cities, and we understand federal subsidies are available for such construction.

We hope you will give full consideration to this alternate proposal.

Sincerely,

Dear Mr. Montgomery:

On behalf of the San Francisco City and County Employees' Retirement Board, we acknowledge receipt of your letter of July 22, 1977 and thank you for your Union's interest in the investment program of the Retirement System.

Our Retirement Board has considered investments in the area of real estate for the past five years and heretofore have not made a commitment in this area. Currently, the matter of real estate, as an investment vehicle for the Retirement System, is under serious consideration. We would like to [illegible] and if the Retirement System does make a commitment in the area of real estate investments, it will be predicated on sound, prudent guidelines and will not be speculative in nature.
